

Technical drawing showing a side view of a 2100mm long assembly. The assembly consists of a central section flanked by two 80mm wide sections. The central section contains a series of circular elements. Two components, labeled 430 E7 19 30 VTA090 19 B, are shown at the ends of the central section.

Diagram illustrating a parallel circuit with two branches. Each branch contains a resistor (represented by a rectangle) and a light bulb (represented by a circle). The circuit is connected to a power source. Labels include "80 (0)" for the voltage across the resistors and "430 E7 19 30 VTA090 19 B" for the voltage across the light bulbs.
